

# Scanned Medical Records

Health Records

>> Simplified

In the healthcare industry, organized, accurate and secure record-keeping is critical. But due to the sheer volume of paper involved, implementing an efficient and cost-effective document management system can be difficult to achieve. And because of multiple factors—such as competition, profitability and regulations—doctors and other healthcare providers need fast access to complete and accurate patient data in order to make the best decisions.

## 3iCare Solution for Healthcare

3iCare SMR offers the entire healthcare industry an affordable, all-in-one solution that converts traditional paper-based processes into efficient, healthcare specific digital workflows—saving time, increasing security and streamlining the storing and sharing of important medical documentation.

### Key Features

- An end to end Solution for cost efficient and fast digitization of Medical Records
- Separate QC interface to ensure high quality standard of the digitized record
- Initiating Scanning from any where using a standard web browser
- Supports AUTO DOCUMENT FEEDER (ADF) and multiple images acquisition
- Saves/Uploads images as BMP, JPEG, PNG, TIFF and PDF files.  
Supports multipage TIFF/PDF files.
- Downloads/Uploads image(s) through HTTP using WebDAV server
- Has user interface developed using PHP
- Is compatible with many databases like MS SQL, MySQL, PostgreSQL, etc.
- Online document viewer

### Benefits

- Reducing medical errors
- Reduce overhead costs
- Create healthcare- customized workflows
- Streamline document routing
- Patient records can quickly be routed to other practitioners for timely sharing, improved accuracy and more effective care.

Healthcare professionals spend 30% of their time working with paper documents—lost time that could be spent working with patients.

3iCare SMR is Stress tested (Live) successfully in a mission critical situation with 900,000 + records
